

Backend Software Developer (m/f/d)

Cuculus is the key to providing utilities to all, while protecting the world's precious resources. Jointly with our international partner network, we provide cutting-edge software and technology solutions to address utility challenges now and in the future. Cuculus will never tire of creating innovative technology and services that enable utilities and organisations to successfully transition to a new era of providing and managing electricity, water, and gas. The work we do is important for individuals, cities, and entire nations. Our work is serious, but we have fun with it, too.

Shape the energy market of the future with us. Join our team in Ilmenau, Leipzig, Erfurt or remote in full- or part-time as Backend Software Developer (m/w/d).

What is the role about?

- Being part of an agile team you will be responsible for the maintenance and further development of the ZONOS platform as well as the development of new, innovative features for our ZONOS platform using Kotlin, Spring Boot and RDBMS.
- With your experience you will make a significant contribution to ensuring that ZONOS can be used on customer systems with low maintenance and under high load.
- You will be developing scalable and distributed applications (based on REST, gRPC, Apache Kafka) and evaluation new technologies and tools to remain competitive for the future.
- You will work together with other development teams, project management and customer support.
- Helping us master the development process in the company through active participation in the agile process (Scrum) .

You fit in with us, if..

- you write maintainable code and are proficient in Java and/or Kotlin and you already have experience in working with Spring and Spring Boot. Additional experience in JavaScript or Python is a plus.
- you have experience in working with relational databases (Oracle 12.2, MySQL 8 or PostgreSQL).
- it is self-evident for you to verify your codes through automatic tests.
- you work in a goal-oriented and structured way and have good analytical skills.
- You enjoy working in an agile environment with colleagues on complex issues regardless of location / remotely.
- you have a good knowledge of written and spoken German and English (our company language in daily use is English! - must-have).

What's in for you:

- Working with exciting technologies and the chance to really make a difference and see your ideas grow into real products.
- Being part of a very international team with high expertise and very good knowledge in a highly exciting market environment.
- Our offices are equipped with modern facilities and there is always fresh fruit and drinks free of charge. You want to work from home from time to time, that is also fine!
- We support you in your personal and professional development. We also organize regular workshops and team events for you and your friendly, open and helpful colleagues across all departments
- An unlimited employment contract with fair conditions and flexible working time models - without any ifs and buts.

Sounds interesting? Great, let's get to know each other. Send your CV and a cover letter to jobs@cuculus.net and let us know why we could be a great match!
