

Product Manager (m/f/d)

Cuculus is the key to providing utilities to all, while protecting the world's precious resources. Jointly with our international partner network, we provide cutting-edge software and technology solutions to address utility challenges now and in the future. Cuculus will never tire of creating innovative technology and services that enable utilities and organisations to successfully transition to a new era of providing and managing electricity, water, and gas. The work we do is important for individuals, cities, and entire nations. Our work is serious, but we have fun with it, too.

Shape the utilities market of the future with us. Join our team in as Product Manager (m/f/w).

What is the role about?

- Working in a cross-functional setup at the intersection of engineering and business.
- Becoming a Subject Matter Expert in our product and using this expertise to present our technology, contribute to our sales activities, and supporting our product marketing initiatives.
- Taking ownership of what our products look like and why we are building them, this includes:
 - Survey the market to identify trends in business/technology and translate these into product ideas and enhancements.
 - Develop the product roadmap by aligning the stakeholders and prioritizing the backlog and product initiatives.
 - Define, monitor, and evaluate metrics to predict and measure product success.
- Manage relationships with strategic technology partners and vendors.

You fit in with us, if...

- You have 3 years of Product Management experience or 5 years of experience within the utility industry.
- You ideally bring professional experience within the utility industry, preferably related to MDM, AMI, HES, CRM, or similar asset-intensive industries.
- You hold a Bachelor's Degree in Computer Science, Math, Physics, or a related engineering discipline.
- You are experienced in the field of market research to identify current trends.
- You feel comfortable talking to your peers, both internally and externally, on various levels related to tech, business, engineering, and CxO.
- You are not afraid of everyday spoken and written communication in English starting from day 1. Speaking German, or any other language is always a plus.
- You can accommodate occasional travel (up to 20%).

What's in for you:

- Being part of an internationally acting and constantly growing technology company.
- Flat hierarchies and the chance to really make a difference and see your ideas grow into real projects.
- A permanent employment contract with fair conditions and flexible working hours and the possibility to work from home - no ifs and buts.
- A pleasant, informal, and open working environment with modern equipment, fresh fruit, and drinks for free as well as regular team events and workshops.
- Other benefits including e.g. day-care allowance, bike leasing and company pension scheme.
- Relocation Support if you decide to join us in one of our offices (Leipzig, Erfurt, or Ilmenau) in Germany.

Sounds interesting? Great, let's get to know each other. Send your application to jobs@cuculus.net and let us know why we could be a great match!
