

Requirements Engineer (m/f/d)

Cuculus is the key to providing utilities to all, while protecting the world's precious resources. Jointly with our international partner network, we provide cutting-edge software and technology solutions to address utility challenges now and in the future. Cuculus will never tire of creating innovative technology and services that enable utilities and organisations to successfully transition to a new era of providing and managing electricity, water, and gas. The work we do is important for individuals, cities, and entire nations. Our work is serious, but we have fun with it, too.

Shape the utilities market of the future with us. Join our team in Leipzig, Erfurt or Ilmenau or work remotely full time / part time as Requirements Engineer (m/f/d).

What is the role about?

- Key position between customers and our development teams in national and international projects in the energy market sector.
- Requirements analysis and review of requirements for new and existing projects.
- Creation of technical solution proposals and/or their adaptation in consultation with the system engineer responsible for the project.
- Coordination of the proposed solutions with product owners and project managers.
- Description and documentation of customer requirements in the form of requirements, use cases, and user stories.
- Support the development teams during their implementation.
- Creation and continuation of a product catalog based on customer requirements.

You fit in with us, if...

- You have several years of professional experience as a requirements engineer, pre-sales consultant, or in a comparable position.
- You have first experience in cooperation with international customers in technically demanding projects. Experience in the energy market is a plus.
- You hold a Bachelor's Degree or apprenticeship in IT, telecommunication environment, or a related discipline.
- You ideally bring experience in working with JIRA, Confluence, and MS Project
- Your strengths lie in the analysis, structuring, and precise documentation of complex customer requirements. Moreover, you are able to recognize limits and conflicts in technical processes and present them in a modular way.
- You are fluent in English - German or/and French is a strong plus but not a must.
- Occasional traveling is no problem for you.

What's in for you:

- Being part of an internationally acting and constantly growing technology company.
- Flat hierarchies and the chance to really make a difference and see your ideas grow into real projects.
- A permanent employment contract with fair conditions and flexible working hours and the possibility to work from home - no ifs and buts.
- A pleasant, informal and open working environment with modern equipment, fresh fruit and drinks for free as well as regular team events and workshops.
- Other benefits including e.g. day-care allowance, bike leasing and company pension scheme.

Sounds interesting? Great, let's get to know each other. Send your application to jobs@cuculus.net and let us know why we could be a great match!
