## Use Cases

### KPI ANALYSIS AND MONITORING

Create centralized reporting systems for business and operational purposes. KPIs for utilities and AMI infrastructure.

### DEVICE AND CUSTOMER BEHAVIOR

Analyze customer and device behaviors, like peak demand, by creating custom algorithms and integrating different data sources.

### EVENT AND ALARM MANAGEMENT

Manage and use events and alarms from your data using real-time and historical information from different sources, including ZONOS IoT Platform to identify and maintain noncommunicating assets.

### SLA MANAGEMENT

Analyze and manage reading SLAs and general system health and statuses.

### MULTI-UTILITY SUPPORT

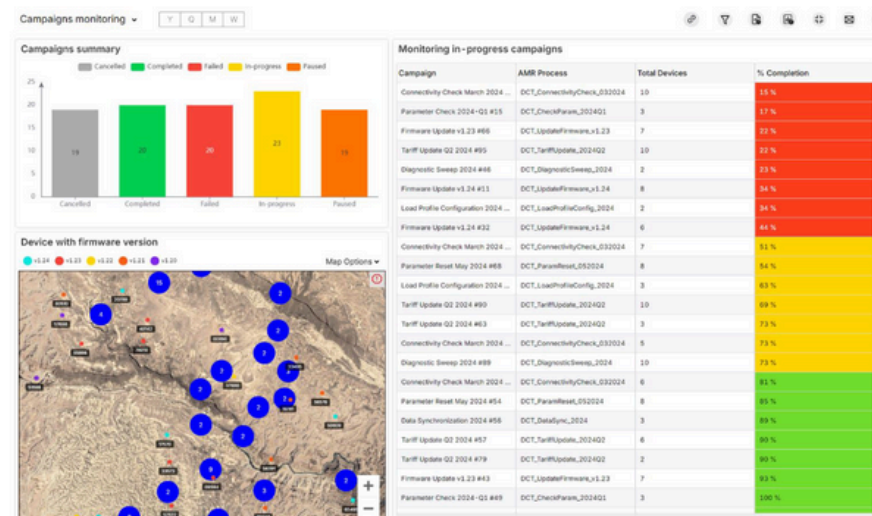

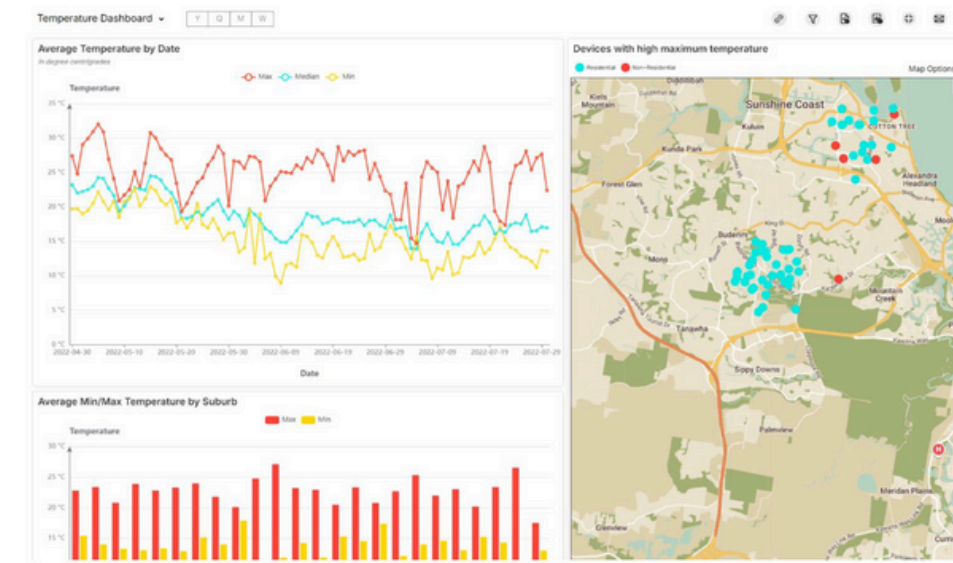

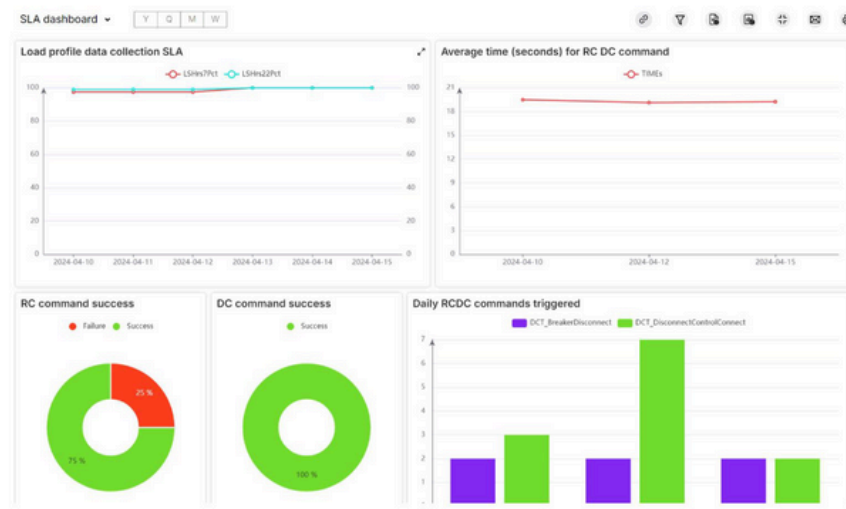

More than just electricity meters! ZONOS ReportPlus seamlessly adapts for water and gas meters. Explore a single platform with endless possibilities for comprehensive utility data analysis.

### AUTOMATED INSIGHTS

Efficiency meets intelligence! ZONOS ReportPlus conducts data analysis and swiftly generates comprehensive reports, empowering you to make strategic decisions seamlessly. Streamline your workflow without compromising control.

## VISUALIZATION

## FEATURES

### INTEGRATIONS

Built-in integration layers like APIs, Webhooks, Kafka, Database and technology, e-Connectors etc.

### INTELLIGENT DATA ANALYTICS

GUI/querying-based reporting to combine and analyze data from multiple sources.

### MULTI-FORMAT REPORTS

Reports in commonly used formats like PDF, xlsx, CSV or graphical outputs.

### BUILT-IN VISUALIZATION ENGINE

Dashboarding engine that supports commonly used widgets and formatting options.

### SCHEDULES AND ALERTS

Automate report runs and refreshes and set up alerts for success/failed runs to keep stakeholders informed.

### GIS CAPABILITIES

Visualize data on maps with support for different mapping styles like heatmaps, bubble charts, etc.

### SELF-SERVICE REPORTING

Create custom reports for different projects in a self-service manner to ensure future readiness.

### SINGLE SIGN-ON

Built-in single sign-on support for easy access management with one credential in the entire ZONOS.

## Affordable energy and water for everyone

## WHY ZONOS REPORTPLUS?

### ONE-STOP SOLUTION FOR ANALYTICS

ZONOS ReportPlus can be integrated with multiple data sources to create a data warehouse and analytics platform for utility operations.

### FUTURE-PROOF

Configurable reporting and automation engine ensures that new reports and dashboards can be set up as the requirements evolve and new devices are integrated.

### PRE-INSTALLED REPORTS

Pre-installed reports like energy audit reports, reliability reports, loss reports, etc., for fast deployment and go-live.

### LIMITLESS SCALABILITY

Multiple database support with a modern analytics engine ensures scalability as data volume increases and reduction in hardware spending.

## We're Cuculus

Enabling utilities and organisations to successfully transition to a new era of providing and managing electricity, water, and gas.
